

Sébastien Labonne

EXPERIENCE

Sébastien Labonne joined ModelCom in 2004. He brings an expertise in finance and quantitative methods, acquired through his university studies as well as professional mandates in the public and private sectors.

He has completed various assignments in telecommunications, financial services, and professional services. As part of these mandates, Sébastien developed a range of financial and budget models and related analyses, and handled large information databases. He has also contributed to the development of investment portfolio management models.

Sébastien holds a Bachelor in Economics and is currently completing his Master's thesis with a specialization in Finance and Econometrics.
